

## Concept Packaging HandCoder

The HandCoder is a tough, hand-operated device that speed-marks your packaging with style.

### Speed-marking

Many times faster than labelling or stencilling. Long life ink capacity allows uninterrupted coding without the need for frequent re-inking.

### Most Porous surfaces

Suitable for porous surfaces commonly used for packaging. Typical applications include cartons, crates, bags, plywood...

### Economically

The flexibility of the system virtually eliminates the need for pre-printed stock thus minimising inventory and reducing waste. Convenient for marking packages even at the point of shipping.

### Easily

An unskilled worker can mark 50 impressions a minute with just an hour's practice.

### Elegantly

Precision moulded rubber typeface and quick drying ink ensure crisp prints with excellent legibility.

## FEATURES

Spring -action Marks in a single uniform motion.  
Springs back to its zero position after each impression.

### INTERLOCKING TYPEFACE

The interlocking arrangement of the typeface provides secure attachment to the roller whilst in use but also allows for the easy removal for different applications.

### Easy to Recharge

Cartridge can be recharged simply by immersing it for an hour in a closed container of Concept marking ink of your choice. Another way is to pour ink on the roller with a dropper-bottle.

### Cartridges

Easy to mount and long lasting in normal use. Smudge-free inking, non-spill operation.

### **Side Springs**

Maintain an even pressure on the printing surface, resulting in a clear, legible code.

### **Adjustable Eccentric Washer**

Ensures parallel and even contact of the ink-roller with the types, resulting in even, smudge-free impressions.

### **Easy-grip Handle**

Moulded from high-impact plastic and designed for comfortable use for hours...

## **SPECIFICATIONS**

### **Printing Method**

- Ink Transfer by Flexographic roller
- 
- Printing speed
- 60 impressions / min
- Printing Area
- 98 mm x 355 mm
- Typefaces
- 8 mm, 14 mm & 24 mm Standard typeface. Logotypes, destinations, etc. can be customised as per orders.
- Concept Marking Inks
- Specially formulated, quick-drying inks are available in black, red, blue, violet and green.
- Concept Inking Cartridges
- Made from specially formulated material to release the right amount of ink for each impression.
- WEIGHT
- 1 kg.

## APPLICATIONS

Portable hand-marking system for speed-marking information on outer packaging:

- Batch Number
- Date of Manufacture
- Expiry Date
- Name and address of Customer/
- Manufacturer
- Product Name / Code
- Shipping Instructions
- Packing Details
- Net Weight / Gross Weight
- Price
- Invoice Number
- Statutory Markings
- Logos / Brand names
- Concept Packaging India

**Concept Packaging can help all concerned in product coding - wherever you may be located.**

- Concept Packaging specialises in systems integration for product identification with complete manufacturing, packaging and logistic systems.
- Concept Packaging offers a complete industrial supplier business to take care of consumables as well as service and training.
- The Concept Packaging network of operating companies and distributors offers local support to customers wherever you may be located.
